

## KLP® Deck Covers & Cribbing Beams

*By using recycled plastic instead of wood, we can offer high quality products and help support the environment. Our products do not rot or splinter, are resistant to most chemicals, oil, solvents, UV, (salt) water, weather and will last significantly longer than any type of wood and are fully recyclable.*

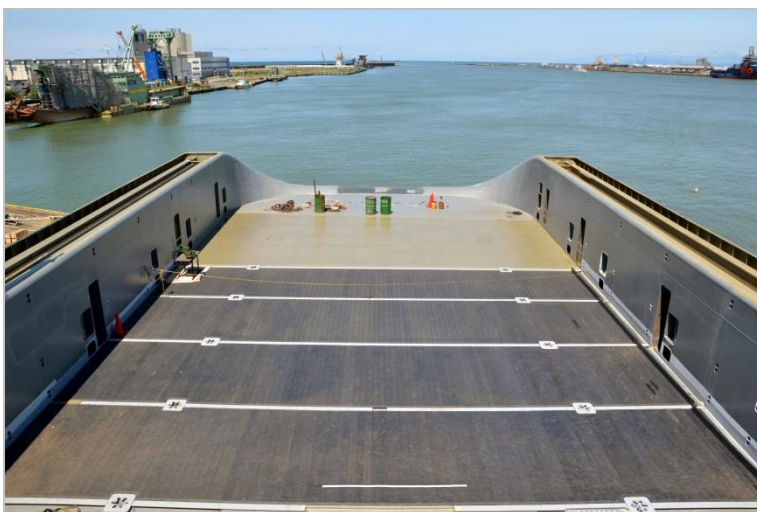

### KLP® Deck Covers

Whether it's for a new build vessel or a ship-deck renovation project, KLP® Deck Covers offer you the best solution. Practical tests have proven that, due to the higher friction opposed to hardwood (specifically in wet conditions), it will contribute to a safer work-environment for the crew. KLP® Deck Covers are a more sustainable and effective solution to protect your vessel during towing and anchor handling operations.

### KLP® Cribbing Beams

Our KLP® Cribbing Beams are able to withstand extreme high loads without losing its property to 'shape' itself to whatever cargo it carries, the beams are re-usable and can be processed with the same tools as any type of wood. KLP® Cribbing Beams offer you the most reliable, environmentally friendly and safe method to transport your precious cargo from point A to point B and is less susceptible to pilferage.

### Advantages of KLP® :

- No rotting, no splintering
- High friction in wet conditions
- Stiff and maintenance free
- UV, water and weather resistant
- Safe and easy to process
- Lower weight than hardwood
- Environmentally friendly and recyclable
- Stable material and product properties

*Creative plastic solutions*
